Rander CTI Client

RANDER CTI software integrated with NEC & Panasonic PBXs brings together the two main communication tools: the computer and the telephone. With Rander and PBX working together, PC and telephone work as one device. Your company can work far more effectively with Rander as it gives you basic call center functionality. Your employees can handle more calls in the same amount of time and you can provide your customers with even better care. Rander displays real-time PBX call activity, shows customer data on incoming calls, and gives you the ability to track and control all calls. Search name or number from a personal or global database and automatically dialed. Rander maintains call history on extension basis and system wide.

RANDER CTI Features

- Rander displays real-time PBX call activity for supervision, management and service betterment.
- You can search phone numbers by names or by numbers from a personal or global database and automatically dial them with a single click.
- Rander shows customer data in case of incoming calls for quick identification. When an incoming call is received, Rander searches the database for the Caller ID number and displays the data about the found number on your PC screen.
- Rander logs all calls made or received system-wide in the database and displays on selected criteria.
- The client-server architecture allows Rander to be used all over the enterprise LAN.
- Rander uses the standard TAPI CTI interface and runs perfectly over the office LAN.

RANDER CTI Benefits

- The system can be monitored in real time to ensure the most efficient operation. Deliver better service to your customers.
- Your employees can handle more calls in the same amount of time providing more intensive contact with customers, improving the customers' satisfaction.
- Identify lost calls. You can find all calls including unanswered ones in the call history.
- Eliminate non-business calls. You can even identify them in real time.
- Suitable for companies of any sizes.
- The pop-up window fades in and out without interrupting the workflow.
- Multiple pop-up windows appear if you receive several calls simultaneously.
- Rander CTI helps you improve the productivity, profitability and efficiency of your company.

Network Architecture

Rander CTI is based on client-server architecture and consists of two basic parts:

- Server part works on a PC connected to the PBX
- Client part works on any workstation over the LAN

Smart solutions for your business needs
